

Since inception in 1992 SPIRIT has become a global brand in top quality voice, video and data communication software products and is well known for innovation.

SPIRIT is a technology enabling company, leveraging its extensive experience in smart carrier-grade solutions for voice and video transmission over packet networks (IP, 3G, WiFi/WiMAX, LTE). More than 200 million embedded voice channels in 80+ countries are based on SPIRIT's technology.

SPIRIT innovative carrier-grade VVoIP embedded communication software platform allows to add real-time voice and video over IP communication feature to every type of IP-service, application or communication device, allowing carriers, device manufacturers, service providers and application developers to streamline time-to-market, differentiate from competition, enhance customer loyalty, reduce churn and boost revenues.

SPIRIT is a one-stop solution provider, offering complete highly optimized VVoIP software products, integration services and support.

SPIRIT's voice and video embedded communication software platform is the ultimate answer to our customers' technical and business challenges, thanks to its scalability, multiplatform support, reliable performance and the highest end-to-end voice and video quality regardless of platform, equipment or network conditions. SPIRIT communication platform seamlessly bundle standard and proprietary highly optimized voice and video codecs, cutting-edge echo and noise cancellation, PLC, adaptive jitter buffer, voice and video synchronization tools, etc., complementing and amplifying network QoS.

SPIRIT products have been licensed to:

- **World's top carriers and service providers**, including British Telecom, China Mobile, Korea Telecom, LG Telecom, Mediarling, Paltalk, Skype and many others.
- **Terminal and infrastructure OEMs and system providers**, including Cisco, Compal, Ericsson, E-TEN (Acer Group), Flextronics, HP, HTC, Huawei, Kyocera, LG, Nortel, Polycom, Quanta, Quescom, Radvision, Reigncom (iRiver), Samsung, Siemens, Sitronics, snom, Thomson, Veraz Networks, ZTE.
- **Leading application software and game developers**, including Adobe, Blizzard Entertainment, Microsoft, Oracle.

VideoMost.com is SPIRIT spin-off for multi-point video-web-conferencing service.

VideoMost ready-to-go software enables multipoint videoconferencing services on standard PCs and Macs over the public Internet.

SeeStorm.com is SPIRIT spin-off for synthetic 3D videoconferencing.

SeeStorm (pioneer in computer vision technologies) enhances voice, video and multimedia service offering allowing next-generation synthetic videoconferencing with personalized 3D characters.

Quick Facts

- Founded – 1992
- Sales Reps – China, France, Germany, Israel, Japan, Korea, Taiwan, Singapore, USA
- R&D Center – Moscow
- Team – 100 people

Areas of Expertise

- Voice and video over IP for Embedded, Mobile and PC
- Web-videoconferencing
- Synthetic 3D video

Target Applications

- Carriers' IP-services: Unified Communications, Enterprise Mobility, IMS, IP-Centrex
- Terminal applications: media phones, netbooks/MiDs, IP STBs, WiFi or 3G/4G mobile handsets, conferencing terminals
- Software for web conferencing, enterprise collaboration, MMO games, IMS-clients, video softphones for PC and mobile
- Web sites/portals: social networks, dating sites, e-learning, blogs and forums
